EXPERIENCE

Since 2016

Product developer / manager freelance

Currently working for @team_vitality, the largest French eSport structure, as head of technological projects working on :

- <https://vitality.gg> : a new version of the website / blog using a from scratch WordPress theme : developed with ES6 POO, Timber templating and full custom XHR routing. Deployed on AWS with Docker.
- <https://shop.gotaga.tv> : Online store using Shopify for a famous YouTuber and eSport player.
- <https://shop.vitality.gg> : I developed the new online store using Shopify and helped to create and manage customs delivery processes including automated dropshipping.
- Node.JS tool to generate automated SEO compliant newsletters sended through Mailchimp
- Few Node.js Twitter chatbot with websockets realtime analytics

Worked for Omen by HP the Hewlett-Packard gaming company :

- <http://alin.hervelin.com/omen> : Custom web application where users can compete against professional video game players, developed using custom basic PHP framework and custom XHR routing, this application is still used by Omen in conventions like Japan Expo and Paris Games Week for digital entertainment.

Worked for few personal projects such as :

- <https://michaelzaccardi.com> : UI designer portfolio with which I won an Awwwards honorable mention
- Chroma-key kill counter for Fortnite video game streams on Twitch used by Gotaga.tv
- Digital processes for a French private group : a showcase website developed with a custom server-side rendered React and a Discord Node.JS chatbot which provide realtime warnings about cryptocurrencies.

June 2018
to Nov 2018

React developer @blueboardio - 6 months internship

BlueBoard is a web SaaS application which helps you to monitor all of your eCommerce distribution. The purpose of my mission was to develop new features and migrate the current stacks from PHP and jQuery to a modern React, Typescript and MobX application. Agile project management.

July 2017
to Nov 2017

Product developer @team_vitality - 4 months internship

I took advantage of my school training time to work with my main freelance client on deploying the new website and thinking about how we may improve communication and intern processes using technologies.

July 2016
to Oct 2016

Communication & media, branding & SEO @luxurycommunication - 3 months internship

Branding and communication consulting. SEO & SMM reporting. Research and development for 5* hotels business bursting using digital communication tools.
